From SB71
Section 8.B.(2)

As applicable, the health care facility's estimated annual amount and percentage of the health care facility's bad debt expense attributable to patients eligible under the health care facility's financial assistance policy and an explanation of the methodology used by the health care facility to estimate this amount and percentage.

In the box below, please report the amount of bad debt expense attributable to patients that are eligible for the facilities financial assistance program

1

What percentage of total bad debt expense is represented by the amount reported above?

2

In the space provided below, please explain the methodology used to create the estimates reported in boxes 1 and 2

MCMC offers financial assistance through a policy that allows patient discounts on income up to 200% of US poverty guidelines. It is almost impossible to accurately determine the bad debt expense attributable to patients that are eligible for the facilities financial assistance program as very few patients are willing to apply for financial assistance or provide household income. The poverty level in Colfax County is 18.8%. We estimate the bad debt percentage from patients eligible for financial assistance to be at least 75% of the total bad debt.
